DETAILED ACTION

Remarks & Response to Appeal Brief

1. The examiner would like to offer an apology to the applicants for overlooking the paper amended after final received on 09/14/04. Since the examiner removes the final office action, that amended paper should be officially entered and considered by the examiner. The examiner now acknowledges to officially entering that amended paper with the amendment of claims 1 and 10 for the further step of “wherein the storing the segment comprises storing the segment at a user location.”
2. Claims 6 and 16 were cancelled therein. Pending claims are now 1-5, 7-15, and 17-20.

Allowable Subject Matter

3. Claims 1-5, 7-15, and 17-20 are allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

The closest prior art of record issued to Kermode fails to teach or suggest a method for pre-storing a portion of program distributed on a plurality of conduits in a linear schedule with staggered start times, including the steps of determining a first start time of the program on a first distribution conduit; determining a second start time of the program on a second distribution conduit; then a stagger time is determined between the first start time and the second start time; and a segment equal in length to the stagger time is stored at a user location; and the detecting step a user request to begin playing the request after the storing step has begun as cited in claims

Art Unit: 2611

1, 10, and 20. Kermode teaches to download segments asynchronously, not synchronously, so Kermode does not conduct the downloading in a linear schedule with staggered start times, and Kermode does not further show the segment equal in length with the staggered times between the two start times but Kermode shows the individual segments instead. In addition, Song et al (US Patent Pub US 2002/0157103 A1-new reference cited) also teaches about the delay of each individual segments (Fig. 3 and page 4/par. 0055), Song is also silent on the step of storing the segment equal in length of the staggered times between the first start time and the second start time of segments of the same program on different conduits or channels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
